

## Infant gorillas

At birth, a gorilla is very small. But it gets bigger quickly.

A mother will carry a young gorilla.

At first, a little gorilla will drink his mother's milk. Then she teaches him to eat leaves and shoots.

## Are gorillas rare?

Gorillas are very rare.  
Their homes may be cut down.  
Some are hunted for their meat.

This was a  
gorilla's home.

Some may get ill and die.  
We must take care to protect them.
